Description :

PDF-1d5af | Iron is one of the most frequently purchased over-the-counter supplements, second only to vitamin C and calcium. The danger is that, once absorbed, iron can only be excreted in minute amounts of less than one milligram a day (or by heavy blood loss), and excess iron collects in a person's vital organs, thus, setting the disease process under way. As organs literally rust away, patients can experie... *Exposing the Hidden Dangers of Iron: What Every Medical Professional Should Know about the Impact of Iron on the Disease Process*
