Description :

PDF-383b9 | While 40 percent of premature deaths in the United States can be attributed to such dangerous behaviors as smoking, overeating, inactivity, and drug or alcohol use, medical education has generally failed to address how these behaviors are influenced by social forces. This new textbook from Dr. Donald A. Barr was designed in response to the growing recognition that physicians need to understand the... *Introduction to Biosocial Medicine: The Social, Psychological, and Biological Determinants of Human Behavior and Well-Being*
